

Quintara®

Quintara®, from Brilliant Systems, is secure web-based e-mail server software for HP Integrity and Alpha servers running HP's OpenVMS operating system. Quintara brings affordable, reliable web-based e-mail server solutions within reach of small businesses, education and the public sector marketplace. Quintara allows users to be mobile, yet retain secure access to their message database and files from almost anywhere on the planet. Global Internet accessibility for your users. Centralized data storage and management for your system administrator. Quintara is a win-win solution for everyone!
